Art Unit: 1732

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2.Claims 1, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art as set forth at page 2, lines 1-16, as set forth in the previous Office action, in view of Bird (5,863,365). Bird teaches or suggests the aspect of machining a material that is easily subjected to NC machining, so that a surface or skin with a base for a product can be prepared using surface or skin data on the product, wherein the material prepared in the machining is made of polystyrene, at column 4, lines 23-28. It would have been obvious to one of ordinary skill in the art to incorporate this teaching of Bird into the method of the admitted prior art since Bird shows that machined polystyrene forms suitable mold surfaces. Under Applicant's remarks concerning insufficient motivation, it is stated that "mere statements that it is "well known and would have been obvious" without pointing to specific support in the cited documents, or knowledge of one of ordinary skill in the art, or some other source, is not sufficient to satisfy the prima facie case of obviousness". It is believed that the Bird reference, now relied upon, provides specific support in a cited document.

3.Applicant's arguments filed April 23, 2007 have been fully considered but they are not persuasive. Applicant presents arguments concerning a combination of documents failing to disclose all elements of the present claims. If a "well known" statement is viewed as the equivalent of a second document, it is the examiner's

Art Unit: 1732

position that these claim elements are disclosed, given the current additional reliance on Bird. The examiner also believes that one of ordinary skill in the art would have a reasonable expectation of success, given the relied upon teaching of Bird.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on (571) 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
